ELSEVIER

Chemical Geology 130 (1996) 301–302

CHEMICAL GEOLOGY
INCLUDING
ISOTOPE GEOSCIENCE

Contents Volume 130, 1996

Research papers

The late diagenetic conversion of pyrite to magnetite by organically complexed ferric iron
L.A. Brothers, M.H. Engel and R.D. Elmore 1

Prediction of the solubility of H_2S in NaCl aqueous solution: an equation of state approach
Z. Duan, N. Møller and J.H. Weare 15

Stability relations of antimony and arsenic compounds in the light of revised and extended Eh–pH diagrams
B.W. Vink 21

Laser oxygen isotope analysis of silicate/oxide grain separates: Evidence for a grain size effect?
A.-M. Fouillac and J.-P. Girard 31

Os isotopes in orogenic lherzolite massifs and mantle heterogeneities
M. Roy-Barman, J.-M. Luck and C.J. Allègre 55

Speleothem luminescence intensity and spectral characteristics: Signal calibration and a record of palaeovegetation change
A. Baker, W.L. Barnes and P.L. Smart 65

Cathodoluminescence and laser-excited luminescence spectroscopy of Eu^{3+} and Eu^{2+} in synthetic CaF_2: a comparative study
V. Barbin, J.-P. Jouart and T. D'Almeida 77

Do marine moulds influence Hg and Si precipitation in the hydrothermal JADE field (Okinawa Trough)?
B. Pracejus and P. Halbach 87

Geochemistry and tectonic setting of magmatic units in the Pan-African Gariep Belt, Namibia
H.E. Frimmel, C.J.H. Hartnady and F. Koller 101

Mineralogy and geochemistry of the carbonates in the Calatayud Basin (Zaragoza, Spain)
M.J. Mayayo, B. Bauluz, A. López-Galindo and J.M. González-López 123

Isotope Section

Improved techniques for stable isotope analyses of microlitre quantities of water from fluid inclusions in halite and concentrated brines
W. Yang, H.R. Krouse and R.J. Spencer 139

Natural long-term annealing of the zircon fission-track system in Vienna Basin deep borehole samples: constraints upon the partial annealing zone and closure temperature
T. Tagami, A. Carter and A.J. Hurford 147

Book review

Quantifying Sedimentary Geochemical Processes, by M. Coleman et al. — K. Ströhle 159

Research papers

Hydrothermal gases offshore Milos Island, Greece
R. Botz, D. Stüben, G. Winckler, R. Bayer, M. Schmitt and E. Faber 161

An improved method for determination of heat production with gamma-ray scintillation spectrometry
R.A. Ketcham 175

Determination of trace elements in silicate rocks by X-ray fluorescence spectrometry on 1:5 glass discs: comparison of accuracy and precision with pressed powder pellet analysis
J. Enzweiler and P.C. Webb 195

An experimentally verified model for calcite precipitation in veins
Y.-J. Lee, J.W. Morse and D.V. Wiltschko 203

Formation of ferromanganese microcrusts in relation to glacial/interglacial stages in Pleistocene sediments from Ampere Seamount (Subtropical NE Atlantic)
T. Kuhn, P. Halbach and M. Maggiulli 217
A review and analysis of silicate mineral dissolution experiments in natural silicate melts
B.R. Edwards and J.K. Russell 233
A three-dimensional method for calculating independent chemical U/Pb- and Th/Pb-ages of accessory minerals
D. Rhede, I. Wendt and H.-J. Förster 247
Pb isotopic composition of late Archaean granites and the extent of recycling early Archaean crust in the Slave Province, northwest Canada
W.J. Davis, C. Gariépy and O. van Breemen 255
Global and local controls influencing the deposition of the La Luna Formation (Cenomanian–Campanian), western Venezuela
J. Perez-Infante, P. Farrimond and M. Furrer 271
Extreme enrichment of Sb, Tl and other trace elements in altered MORB
K.P. Jochum and S.P. Verma 289

Contents Volume 130 (1996) 301
